1. Cloud-based management

Access Points (APs) connect directly to the cloud and are managed entirely from the cloud. No additional hardware access controllers are required.

Hik-Partner Pro is provided by regional Cloud Service Providers (CSPs) such as Amazon Web Services (AWS) to ensure the security of cloud infrastructures.
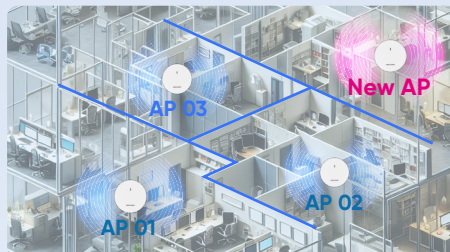

2. Seamless Wi-Fi experience

• One-click network optimization
• Wi-Fi configuration
• Intelligent roaming

3. Convenience for SMBs

Designed for small and micro businesses, such as small offices and coffee shops, with demand for less than 20 access points.

Why Need
Standalone Wireless Access Points?

AP 03
New AP
AP 01
AP 02

Phase 1
Phase 2

Small SMBs setup
Use access points (APs) with an optical modem or home router for a budget-friendly, stylish, and easy-to-manage network.

Extended coverage
Expand Wi-Fi coverage effortlessly with plug-and-play APs when existing coverage falls short.
Flexible phased installation
Begin with gateway devices in Phase 1, then add wireless APs and video security devices in Phase 2—no need for matching brands.

Benefits

## Economic

No need to buy extra access controllers ❌

Lower operational expenses

Free cloud services

Easy

- Quick setup in just three steps
- Visualized network topology at your fingertips
- Flexible networking and easy expansion

Efficient

- One-click network optimization
- Video-network integration, unified cloud management
- Zero-touch provisioning, remote deployment, multi-site maintenance
