

# Quick User Guide

Use Amazon Echo  
To Control Smart Devices

Please scan the QR Code, or get Smart Life downloaded from App Store or Android Market.

## Choice 1 Add Manually (Please turn on your phone's Wi-Fi network)

### 1.1 Add Device:

– Click “+” to add a device.(Please turn on your phone Wi-Fi network)

### 1.2 Go to add the Smart Bulb(Add Manually):

– Click “Lighting” button to choose Light Source (Wi-Fi) or Light Source(BLE+Wi-Fi)

### 1.3 Add the network:

– Select 2.4GHz Wifi network and enter password. If network is 5GHz, please switch to 2.4GHz network;  
**Retet the device via below 2 modes:**

#### EZ Mode

Manually add lighting equipment and select WiFi connection; Power on the bulb with power switch,and repeatedly turn on-off-on-off-on the switch to activate the bulb into rapid blinking status. Wait till the bulb rapidly blinks(about 0.5second per blink). Click the confirmation button.

#### AP Mode

If the bulb can't be connected via EZ mode, try to click “AP mode” on the right corner of the top. Power on the bulb with power switch. When the bulb is rapidly blinking,then turn on-off-on-off-on the switch to ensure that light is slowly flashing. Click the confirmation button.

### 1.4 Add Device:

– When adding device and scanning devices, please ensure the Wi-Fi is good ( or ensure the wifi is 2.4GHz network).  
– If the device connection is over time, please click “cancel” button,ensure that the network is 2.4GHz Wi-Fi network again, switch AP mode, and then restart the connection.

### 1.5 Add Device:

– Register this device on Cloud and initialize the device, then connect successfully.

### 1.6 Add Device:

– Once adding the device successfully, you can click the “SmartBulb” to rename the device, and click the “Done” button to adjust the Smart Bulb.

## Choice 2 Auto Scan (Please turn on your phone's Bluetooth and Wi-Fi)

### 2.1 Add Device:

– Click “+” to add a device.

### 2.2 Go to Add the smart Bulb(Auto Scan)

– 3.2.1 Recognize the smart bulb automatically, then click “Go to add” button to connect;  
**(Bluetooth can auto scan the device)**

### 2.3

– Click “+” on the right side of “Bluetooth Device” to add Wi-Fi;

### 2.4

– Connect the smart bulb by 2.4GHz Wi-Fi: Input Wi-Fi Name and Password.

### 2.5

– When connecting the device, please place your router, mobile phone and device as close as possible;

### 2.6

– The device is connected successfully, you can rename the device. Click the “Done” button to adjust the smart bulb.

### Adjust the Smart Bulb:

#### Adjust the smart bulb color temperature:

- Cold light and warmlight;

#### Adjust the Light color (There are 160 thousands colors to change):

### Create a Light Group

1. click "Create a home"
2. Edit the name, set the home location, and select the rooms. click the phone right corner "save"

3. Return to the Main interface "Home", click the phone left corner to manage.

### Enable Smart Life skill in Alexa APP

Choose "Skills" in the options bar, and the search "Smart Life" in input box.

Select Smart Life in the search results, and then click "Enable Skill"

Then input the user name and password that you had previously registered. only support the account in the United States.

### Control Smart Bulb by Voice

After the above operation is successful, you can control the bulb via Echo.

#### Discover devices

Firstly, you need to say to Echo: Echo (or Alexa), discover my devices. Echo will start to find the devices which is added in Smart Life APP, which will take about 20 s then it will tell you the result. You can also click "Discover devices" in Alexa APP, then it will show the devices that found successfully.

### Control devices by voice

The name of the device must be consistent with the addition of Smart Life App.

You can also group the bulbs and give instructions to control them together.

#### Attention:

Echo is one of the wake-up names, which can be any of these three names (Setting): Alexa, Echo, Amazon.

#### Support Skill List:

You can control devices by instructions like these.
